### SCREW TIP AUGER BIT SET FOR STRAIGHT, DEEP HOLES IN TOUGH MATERIALS

Screw tips keep these tough bits on track while the full length twist removes chips from deep holes. A sharp outlining spur keeps the hole smooth throughout its depth. Shanks are hexagonal to fit into 3/8" or larger drills. Each bit has the size clearly marked. Not for use in a drill press. They will work best in a variable speed hand drill. Overall length is about 9". The seven piece set includes 1/4", 3/8", 1/2", 5/8", 3/4", 7/8", and 1".

### QUICK-CHANGE DRILL BITS

By slipping a Chuck-Mate™ over a 1" long driver bit and locking it into place, you can convert quickly between drilling and driving. The Vix bit style centers the drill bit in hardware mounting holes. The tapered drill bit style helps woodscrews grip along their whole length. Countersinks are all 3/8". Works with any 1/4", 3/8" or 1/2" hand drill.

### WRAP-AROUND HINGE

Attaches to the edge and back of the face frame for maximum strength. Works with flush inset 3/4" thick doors. Best for oversize, plywood doors since screws attaches to the back instead of the weaker edge. Brass-plated steel. Fixed pin. Uses five #6 screws. Screws not included.
